DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Specie A1: wherein the monitor is a levered magnetic detector (see claim 3)

Specie A2: wherein the monitor is a strain gauge working in bending (see claim 4)

Specie A3 wherein the monitor is a strain gage working in tension (see claim 5).

Specie B1 wherein the fibers consist of one glass.

Specie B2 wherein the fibers comprise glass and another non-glass material.

Specie B3 wherein the fibers consist of two or more glasses.

Examiner is uncertain as to how claims 6-7 and 11-18 are to be interpreted, and thus there are three choices, B1-B3

Applicant is required, in reply to this action, to elect a single species for each group (A1-A3 and B1-B3) to which the claims shall be restricted if no generic claim is finally held to be allowable. **The reply must** also identify the claims readable on the

elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-2.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As indicated in the PCT report, claim 1 is not patentable in view of US 4036622 as well as other documents. Therefore, claim 1 does not have a special technical feature. The only thing that is common among the species is the material of claim one: thus the only same and corresponding features are not special technical features. Therefore the species lack the same or corresponding technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
